North Garneau: Progress Report

The tenants of 10 University-owned houses in North Garneau will be safer, warmer, and hopefully happier this winter as the result of work now being carried out under a new rehabilitation program for houses in the area. The program is based on a revised maintenance policy established by the North Garneau Management Committee. The new policy differs from the old in that it actively seeks tenant assistance in identifying problems that require immediate attention as well as conditions that may require attention in the near future.

THE POLICY

1. (a) Tenants should be asked to continue to report emergency problems (e.g. plumbing, heating, and electrical problems) to Royal Trust who will take immediate emergency measures to ensure safe occupancy of the house.

(b) Tenants have been asked to complete questionnaires as to the condition of their house. These reports will be discussed and referred to Royal Trust for action as time and resources permit.

2. In the event that remedial measures are estimated to constitute a major repair (e.g. in excess of \$200), Royal Trust will refer the problem and estimates to the North Garneau Management Committee (NGMC) for review of the total condition and economic feasibility of effecting the repair.

3. Recognizing that the University is not in a position to effect all repairs and decorating problems in the immediate future, tenants may wish to undertake to do some of the work themselves. In this event:

(a) The tenants should forward a statement to Royal Trust to indicate the kind of work they wish to undertake and the materials that they require for this purpose.

(b) Royal Trust will inspect the premises and approve the proposal, if reasonable and within the \$200 limit.

(c) Proposals in excess of \$200 will be dealt with as in p. 2 above.

(d) Upon receiving authorization from Royal Trust, the tenant may proceed at his own expense to effect the repair within the terms of the authorization and report its completion. In his report the tenant will state briefly the work that has been done and the expenses that have been incurred with invoices attached and submit it to Royal Trust.

(e) Royal Trust will again inspect the premises to determine the effectiveness of the work and make reimbursement by cheque.

(f) In the event of disagreement between the tenant and Royal Trust as to the reasonableness of the proposal, authorization, or effectiveness of the work done, the question will be determined by the NGMC before proceeding to the next step.

NOTE: The Royal Trust is the agent of the University and manager of all houses rented in the North Garneau community. Tenants should direct all enquiries and correspondence to MR. R.L. PAQUETTE, Rental Manager, Royal Trust, 10039 Jasper Avenue, Edmonton; 426-7710.

THE RESULT

Renovation work is proceeding on the pilot project of 10 houses, and these and other vacant houses are expected to be back in the rental stream within two months.

Maintenance Program

A policy for upgrading the maintenance program for all the houses has been adopted. As an initial step in this program, a questionnaire was forwarded to all tenants with the previous report but only about one-third of these questionnaires have been returned. Tenants are asked to complete and forward these questionnaires as soon as possible. As a result of the questionnaires received, a survey of the houses is being made by Mr. Paquette of Royal Trust in conjunction with Mr. Dan Pretzlaff (Physical Plant) who is the Project Manager representing the Committee.

Of primary concern in the initial review is the condition of the roofs and other critical deficiencies within the houses that represent a risk to safety and health. Tenants are asked to co-operate with these gentlemen when they call at their homes.

DOROTHY I. HAMILTON 1904-1974

MISS DOROTHY I. HAMILTON, a member of the University Library staff for 40 years, died August 11, 1974 in Victoria, British Columbia. She had retired from the University in 1969.

Miss Hamilton was the first Library staff member to take professional training. After receiving her BA from this University in 1929, she entered the Bachelor of Library Science program at the University of Washington and obtained her degree in 1931. She returned to Alberta that year as the University's Medical Librarian and was made Head of Public Service in 1934. In 1942 she was awarded the Master of Library Science degree by the University of Michigan. Continuing her career, she became Chief Reference Librarian here in 1950 and Rare Book Librarian and Archivist in 1963. Miss Hamilton also was the first president of the Edmonton Library Association.

RICHARD KERR

barricade can be made effective. It is hoped the tenants will appreciate the intent of this policy, which is to prevent their community from becoming a free-for-all parking zone.

Tenancy Policies

As completed houses are put back into the rental stream, additional empty houses will be required for remedial work. The Committee has therefore asked Royal Trust not to re-assign leases which are being terminated from time to time by existing tenants so that these houses may be reviewed by the Committee for the next step in the renovation project.

Applications for completed houses are being received by the Committee and will be considered in the order of receipt. Applicants are asked to state the names of the group that wish to reside in the house and their status as students (i.e. whether they are full-time students and, if part-time students, the number of credit courses for which they are registered). They should also state the size of the house that they require (i.e. number of bedrooms) and other facilities specifically requested. Applications are being reviewed in order of receipt with reference to the facilities contained in the house available. To facilitate this review, a space survey is being made of all houses in the community and, once again, tenants are asked to co-operate with the staff members, some of whom are students working on a part-time basis, so that this space survey can be done as quickly as possible.

Algonquin and Colorado Apartments

A study of these two buildings is being initiated to ascertain their condition and to obtain estimates of costs involved in renovations. Once again, the tenants are asked to co-operate with those who are commissioned to undertake this work.

What Lies Ahead?

We (the Committee) trust the foregoing report will give residents in the community some understanding and appreciation of the work that is being undertaken. Because of the shortage of competent technicians and the accelerating costs of construction work in general, it is impossible to do all of the work on all of the houses as quickly as we would like. We would like to assure you that work is proceeding as quickly as possible under the circumstances, and that priority is being given to the more serious and immediate problems. We would also like to assure you that the minimal maintenance policy under which Royal Trust was obliged to work in the past has been changed and they will now be in a better position to meet the reasonable requirements of tenants as time permits.

(Continued from page one)

Parking Policies

A provisional parking policy has been adopted which eliminates zone parking by non-tenants in the community. To achieve this purpose, signs have been erected at the entry of lanes to indicate that tenant parking only is permitted. Vacant lots previously used for zone parking are being barricaded and tenants are asked to restrict their parking to what space may be available in the rear part of their own lots. Responsibility for protecting their right with respect to this space will rest with the tenants. Barricades on the vacant lots will be permanently staked as of Monday, August 26, 1974, and tenants are requested to move all cars from vacant lots prior to this date. Cars found in the vacant lots following this date will be towed away so that the permanent
